No Matter Where You Are in Your Pharmacy Career, CPhA is There.

Join today to safeguard your license, defend your profession, and advance your practice.

Protecting your license, your practice and your profession.

Every Day, the California State Legislature is considering bills that could threaten your scope of practice and your ability to help patients. CPhA is actively engaged, working with authors of the bills to ensure that your role as the medication expert on the healthcare team is advanced and the status of the pharmacy profession is protected.

Whether it is budget cuts, e-pedigree, healthcare reform, reimbursement issues or scope of practice, these are just some of many issues facing pharmacy each year. It takes teamwork to confront these challenges and move pharmacy's agenda forward. By becoming a member in CPhA, your dues help to provide the Association with the resources it needs to prevail against threats to pharmacy. With your support, we can all work together to advance, advocate and protect your profession.

Visit the CPhA website at www.cpha.com for more information on membership and issues facing pharmacy.
