Company Background

ITWatchDogs helps prevent disastrous situations resulting from climate and power related issues among facilities in healthcare and IT. Our products allow users to keep an eye on environmental parameters such as temperature, humidity, water leak detection, door position, power failure and more, enabling users to take corrective action to prevent loss of critical inventory and other assets.

Our friendly, knowledgeable and professional engineers provide superior service and customer education, and demonstrate our commitment to quality and innovation.

ITWatchDogs is a division within the Data Center Solutions Group of Companies held by PCE. Headquartered in Lincoln, Nebraska, PCE is privately held and has offices worldwide.

Product Overview

For maintaining and monitoring conditions at storage facilities for vaccines, tissue banks, blood samples, and other biological samples, turn to the solutions offered by ITWatchDogs. The rise of electronic health records and health information exchanges puts greater pressure on healthcare providers to keep updated logs on their storage conditions, and our solutions make this process easier by automating logs pertaining to environmental monitoring.

Trade Shows/Meetings Attended

HIMSS and ASHP

Pricing Information

ITWatchDogs environment monitors start at just \$189 for web-based temperature/humidity monitoring. Our solutions are fully scalable allowing users to monitor a single point to hundreds of points in a local environment. Our products are a one-time expense and come with FREE technical support and firmware upgrades, requiring no subscription contracts. All products come with a 30 day money-back guarantee.
