

OUR GOAL— PATIENT SAFETY

LEVELS OF STERILITY ASSURANCE

Through continued innovation we strive to support your efforts in climbing the ladder of increased sterility assurance.

TRUE STERILITY

Automated Advanced Aseptic Compounding™

Using our MIC-EDU Systems, you are just below true sterile compounding. Our MIC-EDU Systems provide a level of patient safety currently unmatched in the industry.

FDA expectation in pharmaceutical processing

Achieving true Advanced Aseptic Compounding™

Our MIC-Single and MIC-Dual fall into this category. Using a gas-tight, closed system significantly improves your sterility assurance level and directly improves patient safety.

Expected minimum sterility assurance level while meeting the USP<797> requirements

Our MIC-797P falls into this category along with most BSCs, exhaust type isolators and laminar flow workbenches.
