

A Proven Winner!

What is keeping you from WINNING?

- Not enough hours in the day to satisfy production demands?
- Prescription filling errors too high?
- Bottom-line shrinking due to regulations?
- Overtime cutting into your profits?
- Limited by ratio of Technicians to supervising Pharmacists?
- Staff attrition problems of both Technicians and Pharmacists?

DOSIS L60 is proven to help pharmacies reduce their costs and hours spent filling single-medication blister cards. In LTC, the traditional blister card format is still the most popular and cost effective method to accurately deliver medication. **The L60 is the leading automation for truly assisting pharmacies with fulfilling blister card prescriptions.** Let the DOSIS team of experts work with you to implement an L60 robot and **HELP YOU WIN!**
