

# The perfect complement to your current workflow system.

ArmadaOne is an integrated web-based software platform that optimizes specialty pharmacy operations, prescription workflow and overall patient management. Armada has developed this new platform to seamlessly integrate with pharmacy dispensing systems and workflows used by specialty pharmacies across the country. ArmadaOne features include on-boarding specialty patients, streamlined management for prior authorizations, connectivity

with co-pay and patient assistance programs and ongoing clinical consultation and compliance monitoring. Other benefits include real-time data reporting for Pharma/biotech manufacturers, health plans, prescribers and other industry partners. ArmadaOne's robust business intelligence also provides prescription status information, operational insights and other essential pharmacy management and productivity reports.
