Management

Prescription  
Transfers

Dynamic  
Reporting

Asembia1 is an integrated web-based software platform that optimizes specialty pharmacy operations, prescription workflow and overall patient management. Asembia has developed this platform to seamlessly integrate with pharmacy dispensing systems and workflows used by specialty pharmacies across the country.

Asembia1 provides Pharma/biotech manufacturers and other industry partners with robust business intelligence through an interactive dashboard. The benefits include real-time visibility of time-to-fill metrics, prescription statuses and sub-statuses, sales metrics information, and other essential pharmacy management and productivity reports.
