

Only the best for your temperature sensitive pharmaceuticals

Precise temperature control is essential for your valuable medications and vaccines. Provide the highest level of patient care with Helmer refrigerators and freezers.

- » Powerful forced-air refrigeration systems provide superior temperature uniformity and quick recovery, maintaining efficacy of stored drugs and reducing the risk of lost product
- » Built-in alarms and monitoring help you meet compliance and rest assured that your medications and vaccines are stored safely
- » Full product line designed for nursing floors, USP 797 and USP 800 cleanrooms, as well as the central pharmacy

Reliable, safe, and effective solutions to help you provide the highest standard of patient care
