

Complete Specialty Pharmacy Monitoring Solutions

# End-to-end insights

Simplify PQ testing with inexpensive programmable wireless sensors

Track exposure to heat and cold throughout transit

Remotely monitor pharmacy facilities 24/7

Store data and generate critical accreditation and regulatory reports

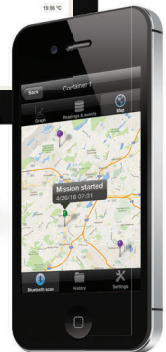

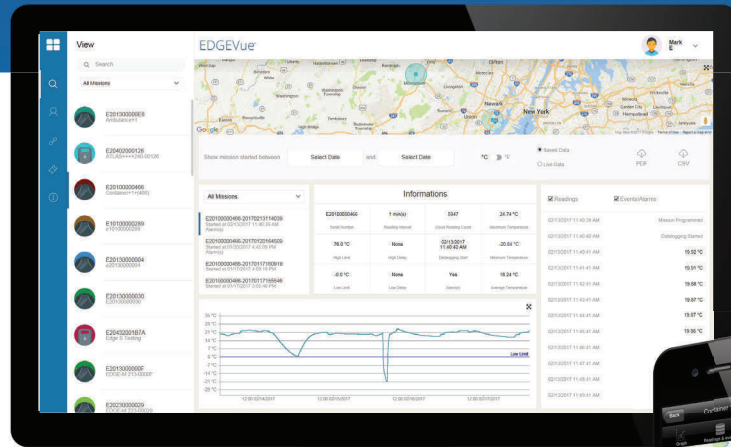

Increase patient satisfaction and reduce expensive reshippers

# EDGE™

Wireless. Connected. Sensors.

Temperature Intelligence™

EDGE M-300 is an easy, cost-effective way to log and retrieve data through packing materials, containers, and trucks for performance qualification (PQ) testing. Sensors are simple to setup and monitor with EDGEvue, which generates critical reports and uploads data to EDGECloud™ for storing and sharing.
