

# 1 in 100 Healthcare Workers Divert Drugs

## Protenus Drug Diversion Surveillance

Patient data displayed is fictitious and is for demonstration purposes only.

*Reduce theft and misuse of controlled substances in your organization with Protenus Drug Diversion Surveillance*

*With Protenus, you can:*

- **Achieve 80%+ reduction in time to the detection of drug diversion.**
- **Audit 100% of medication use transactions** by utilizing artificial intelligence and advanced analytics – reducing the risk to your workforce, organization, and most importantly, your patients.
- **Prioritize the highest risk incidents and reduce false positives** with a unique, case-based approach which is 2.5x more likely to detect true diversion incidents with 94.5% accuracy.
- **Identify and surface incidents automatically** from a broad range of data sources.

**Learn more at [Protenus.com](https://Protenus.com)**

**“Protenus Diversion Analytics completely changed the workflow of our drug diversion monitoring. We have gone from a decentralized, report-based system to a centralized, software case-created software system, and our investigation process moves things back toward nurse leaders.”**

– Director, March 2024

*Empowering  
Healthcare to  
Eliminate Risk*
