

VMI INDIVION

AUTOMATED POUCH PACKING SYSTEM

The INDIVION is VMI Care's answer to the high efficiency and capacity demands of today's pharmacy industry. The need for lowest cost of every pouch produced combined with highest accuracy, was the basis for designing the VMI INDIVION and the accompanying PHARYS software suite.

The INDIVION produces multi-dose medicine pouches and forms the heart of VMI's high volume automated pouch packing solutions. The machine has a proven speed of over 10,000 pouches per hour with a phenomenal low error-rate. In addition, it has multiple unique features to minimize pollution and cross-contamination during the repacking process.

Please visit our website vmi-care.com to get further information on our INDIVION + PHARYS offering.
