

Axial® from Euclid: A Complete Adherence Pouch Packaging Solution

Prescription filling and dispensing has never been faster, easier, or more adaptable to a wide variety of workflows.

Increase revenue, improve patient care, and differentiate your pharmacy with smart and economical automation.

There's an Axial® machine to fit every pharmacy workflow

The Axial® RMD-130U, RMD-144 and RMD-352 are designed to meet the needs of pharmacies of all types. Whether a small standalone operation or a massive hospital or nursing home, there's an Axial® product right for you.

Faster and more efficient pill packaging is here

- Euclid's next generation Axial® machines leverage a new rotary design, includes an integrated dehumidifier, and are among the smallest, quietest, and most durable productivity-enhancing machines on the market.
- Numerous canister options, including standard, universal, manual fill trays on some models, so you'll always have multiple options – without sacrificing speed or reliability. Unit or multi-dose at up to 65 packages per minute.
- This smart design also allows for easy access to the RFID canisters, and you can run and fill canisters at the same time providing best in class daily packaging output.
- MyMeds+® is a marketing tool kit available to help you promote your new packaging service once you get a machine. Most pharmacies can show a positive ROI in the first year.

All of our machines are built to last and are backed by our industry-leading customer service team. Invest in the future of your business and in the health of your community today! Contact us for a free demo or ROI Analysis.
