Product Line Overview

Follett medical-grade pharmacy refrigerators and freezers maintain precise and consistent temperatures for your valuable medications and vaccines. Powerful forced air refrigeration enables quick recovery after door openings, ensuring your critical products are stored at specified temperatures and reducing the risk of lost product.

■ Follett Infinity Series™ upright refrigerators and freezers feature a powerful top-mounted refrigeration module and innovative plenum air distribution system for superior temperature consistency.

- Patented “infinite” variable speed control algorithm delivers only the precise amount of refrigeration needed at any given time, providing a $\pm 1^{\circ}\text{C}$ temperature consistency throughout the storage cabinet while minimizing noise and energy consumption.
- Industry-exclusive ducted air distribution delivers cold air at multiple levels for top-to-bottom temperature uniformity, allowing full utilization of the storage space.
- All models are NSF 456-Certified for safe vaccine storage.
- Intuitive full-color touchscreen user interface features enhanced data management with data downloading capability, providing the ultimate in user convenience.

■ Full stainless steel cabinet and high-quality components designed with the user in mind.

- Heavy-duty, self-closing doors provide important energy savings and lock open at 90 degrees to allow easy product loading.
- Interchangeable storage options.
- Choose from epoxy-coated shelves, full extension epoxy-coated “floating” baskets, or full extension stainless steel drawers.
- Interior can be reconfigured at any time to accommodate changing storage needs.

■ Follett’s innovative modular refrigeration system provides outstanding serviceability.

- Top-mounted modular design allows the entire refrigeration system to be removed as one unit without cutting refrigerant lines. If needed, a spare system can slide into place, virtually eliminating downtime or the need to relocate product.

■ High-performance countertop refrigerators and freezers offer superior temperature performance in space-saving configurations.

- 1 and 2 cu ft models fit on standard 24" deep counters.
- Forced-air cooling provides cabinet-wide temperature consistency and quick recovery after door openings.
- External digital temperature display in user-selectable F or C with integral high/low alarming and display sleep mode.
