## Company Background

We are committed to prioritizing affordable healthcare, making it accessible to all, and creating a positive impact on society through our services and partnerships. Through a complete technology suite, integrated service delivery, and elevated 340B expertise, Nuvm's holistic solution yields enhanced drug inclusion, increased financial performance, and improved patient care.

Nuvm's story began in 2014 and grew quickly into three separate brands: 340Basics, Assent, and Apovia. Together in improving accessibility and adherence to clinical care, but seemingly independent in operation. As the brands grew and expanded, the value of joining forces became clear. In 2023, Nuvm merged their expertise and resources, bringing one comprehensive solution, streamlined experience, and equitable partnership to medically underserved, non-profit healthcare organizations.

Combining all of our solutions and services represents our commitment to facilitating 340B programs — from compliance and optimization to patient engagement and education — through a fully integrated suite of cloud-based pharmacy tools and personalized support.

## Product Overview

■ **340B Technology: Enhance program management, increase savings, and optimize performance.**

Nuvm's proprietary software empowers all eligible organizations to efficiently manage the complexities of the 340B pharmacy program with a technology suite including TPA services such as contract pharmacy, split-billing, and advanced referrals. Our industry-leading technology solutions, knowledge, training, and service offerings enable healthcare organizations to increase claims capture and optimize their programs' clinical and financial results.

Our 340B technology suite offers precise attention to detail with flexibility to be customized to each organization's unique needs.

## Features & Options

■ **Pharmacy Management: Implement a more robust healthcare mission and enhance financial performance.**

We offer pharmacy management services to implement and manage in-house pharmacies to improve patient script capture and mitigate the impact of manufacturer blocks. Nuvm offers top to bottom support in building or managing in-house pharmacies by guiding covered entities through the process from credentialing, licensing, and construction to ordering, hiring, and more, so the organization remains focused on providing the best care for their patients.

## Product Specifications

■ **Program Optimization and Compliance: Acting as an expansion of your team, our dedicated team of 340B experts do the work, so you can stay focused on providing the best care for your patients.**

Our experienced team of 340B program investigators thoroughly review healthcare organizations' prescription data, policies and procedures, and contracts, then build a solution to maximize savings and maintain HRSA compliance with components that meet a program's unique needs. Bundling services that reveal opportunities for savings, along with HRSA Audit support into a holistic solution empowers healthcare organizations to have visibility into all areas of their 340B programs.

Our full suite of Optimization and Compliance services includes Comprehensive 340B Program Management, ESP Management, Audit Services and Support, HRSA Corrective Action Plan (CAP) assistance and implementation, Drug Cost Efficacy and Utilization analysis, Policies and Procedures Development & Review, Covered Entity HRSA/ OPAIS registration, and more.

## Testimonial

*"Your entire team has a wealth of experience matched with a caring heart and a fierce determination which has enabled you to accomplish so much and I thank you for sharing that well-earned insight."*

— Executive Director, Health Center, Brooklyn, NY
