Company Background

Since its inception in 1960, Prudential Cleanroom Services (PCS) has been at the forefront of providing superior cleanroom apparel services. What started as a humble endeavor has flourished into a renowned North American entity, serving a wide spectrum of industries such as compounding, bio-science, pharmaceuticals, medical devices, semiconductors, aerospace, and beyond.

At PCS, we specialize in delivering tailored cleanroom solutions to facilities involved in the compounding and preparation of medications and sterile infusions. Our comprehensive services ensure that medications are manufactured under meticulously controlled conditions, mitigating the risk of contamination and maintaining patient safety.

By utilizing PCS's services, businesses gain access to top-tier sterile gowning and essential ancillary items crucial for maintaining cleanroom standards and ensuring accurate gowning procedures. This not only reinforces cleanroom standards but also bolsters operational efficiency and regulatory compliance.

One distinguishing feature of PCS is our unwavering commitment to excellence. We take immense pride in being the sole national provider with all locations certified to the ISO 9001:2015 standard, all PCS serviced items are finished and packaged in an ISO Class 3 Cleanroom. Our sterile product is all validated at six log reduction through gamma radiation; 1,000,000:1 bioburden risk reduction. With a rich history as industry pioneers, coupled with our relentless pursuit of improvement year after year, PCS offers unparalleled value as your trusted cleanroom garment service partner to deliver unmatched quality and reliability.

Product Overview

■ **Cleanroom Uniforms and Apparel:** Prudential carries both sterile and non-sterile garments for a variety of cleanroom needs. Our products utilize non-linting, high density fabrics that are resistant to liquids and bacteria.

■ **Non-Garment Reusable Products:** From hood mops, floor/ceiling/wall mops, to goggles, Prudential aims to provide comprehensive support for your cleanroom facilities. We carry both sterile and non-sterile products for a variety of cleanroom needs.

■ **Cleanroom Fabric Study:** Prudential offers the contamination control industry an independent third-party cleanroom fabric study that credibility tests and rates the industry's most widely recognized fabrics.

Features & Options

■ **ISO 9001 Certification:** PCS, the world leader in cleanroom laundry service systems is ISO 9001 Certified for its Quality Management System by TUV America, Inc. This certification applies to PCS's corporate headquarters and its national network of cleanroom and industrial processing facilities. The scope of the Quality Management System ISO certification includes providing cleanroom and industrial apparel along with other contamination control products and services for use in controlled environments.

Product Specifications

■ **Garment Tracking System:** GTS RFID/Barcode Tracking System provides our customers with a complete account history report for each garment from installation to any repairs. It also tracks usage analysis by wearer, department, and distribution point.

■ **Stock Garment Program:** Our STOCK program provides a service that is unique to the industry. The high-quality services Prudential delivers each week are thanks in part to our one-of-a-kind distribution center. It is the heart of our operations that ensures we remain the leading uniform service, cleanroom, and facility services provider in North America.

■ **Sterilization Validation Program:** The validation activities contained in our validation manual and subsequent reports are based on ANSI/AAMI/ISO 11137:2015 (Sterilization of Health Care Products — Radiation — Part 1 Requirements for Development, Validation and Routine Control of a Sterilization Process for Medical Devices). The validation is performed to ensure that the products meet PCS sterility requirements.

■ **Sustainable Gowning Protocol:** Help drive sustainability programs by reducing consumable products (disposable coveralls, hoods, boots, masks, goggles, mops, and sleeve covers) all items you throw away and convert them to a reusable solution.

Markets Served

Compounding/Pharmaceutical/Biotechnology; Medical Device; Semiconductors; Aerospace; and other companies manufacturing and operating in controlled environments.
