SO-LOW
 Environmental Equipment Co., Inc.

Company Background

Since 1959, So-Low Environmental has been manufacturing ultra-low temperature freezers, and laboratory and medical cold storage equipment. Based in Cincinnati, Ohio, the family owned and operated company has shipped equipment worldwide to over 130 countries. Our goal is to provide the highest quality cold storage equipment with a personalized customer service experience.

Product Overview

So-Low Environmental offers a comprehensive line of ultra-low temperature freezers to -85°C, along with medical-grade refrigerators and freezers designed to meet the demanding storage needs of sensitive medications and vaccines. Our refrigeration systems are designed to keep your valued content in a uniform and stable temperature environment. Select models are tested and verified to Lab Grade Refrigerator and Freezer Energy Star® certification to help minimize operating costs. Our equipment is built to last using the highest quality materials. Precise and user-friendly digital controls have all the alarm features you depend on to be informed when intervention is needed. Built in portholes allow access to the chamber for third-party probes for additional data recording and monitoring. We offer upright and chest style equipment to fit your space and storage requirements. Sizes range from small undercounters to large three door units with custom sizes available upon request.

Key Business Partners

So-Low Environmental is the U.S. distributor of Liebherr Scientific and Healthcare cold storage equipment. We believe all medical and scientific professionals should have access to the highest quality cold storage equipment. Liebherr products grow our catalog to ensure our customers have the highest quality choice for their cold storage.
