Company Background

What began in 1978 as a garage-based business at the home of HCL[®] Owner Gary Sharpe now encompasses five well-equipped facilities in central Ohio and reaches customers around the globe. Employment has grown, with more than 300 employees dedicated to the company's mission of providing unmatched customer service. Sharpe discovered early in his career the need for healthcare products in sizes, quantities, and materials not readily available and was determined to deliver. And has he ever. Today, HCL's inventory includes more than 9,000 different products, all designed to provide "special answers to special problems." Most of these items are maintained locally in more than 320,000 square feet of warehouse space and meet the supply needs of hospitals, pharmacies, chain drug stores, pharmaceuticals, and many other facets of healthcare.

Product Overview

■ Stat Temp[®] — Wireless Temperature Monitoring

Avoid dangerous temperature excursions and save thousands of dollars in drug waste with this web-based remote monitoring system from Health Care Logistics[®]. Set parameters and simultaneously monitor room temperatures, storage temperatures, and humidity levels to ensure accuracy and protect medication integrity. Easily customize the system to accommodate site-specific preferences, a feature especially beneficial to facilities not staffed 24 hours a day.

With Stat Temp users can mount monitors anywhere and transmit information wirelessly without installing software; configure real-time alert notifications for designated personnel; log excursion resolutions with user information and action taken; and instantly access cloud-based reports for process review, compliance, or inspection.

Schedule a virtual or on-site demonstration to see how this fully customizable system can transform temperature monitoring without equipment, without subscriptions, and without worry.
