# KwikDose Oral Dispensers From MedSafety Solutions, LLC

KwikDose oral dispensers accurately deliver small volumes of oral liquid medication. Enlarged numbers and easy-to-read marking lines allow for quick and accurate volume identification, even with dark liquids. The unique tip prevents wrong-route administration.

## Company Background

Founded in 2016 by industry professionals with decades of collective medical device experience, the MedSafety Solutions team speaks your language and understands your hospital pharmacy's non-negotiable need for quality, efficiency, and predictability when selecting critical equipment and supplies. Nimble by design and friendly by nature, our team will do whatever is needed to make sure that you are well informed about your IV administration choices and completely satisfied with the products and services you receive. Our goal is to be a trusted partner, and we know that reliability, responsiveness, expertise, and a friendly, human touch are what it takes to earn that trust.

## Product Overview

The latest addition to Medsafety Solution's product family is the KwikDose oral dispenser. The KwikDose oral dispensers offer the same high-quality oral dispensers pharmacies know and trust. The unique tip prevents wrong-route administration. Enlarged numbers and easy-to-read marking lines allow quick and accurate volume identification, even with dark liquids. KwikDose oral dispensers are available in six convenient sizes (0.5, 1, 3, 5, 10, and 20 mL), in both clear and amber. Also available with blue self-righting tip caps.

## Product Specifications

- Sizes: 0.5, 1, 3, 5, 10, and 20 mL
- Available in Clear and Amber
- Made in Denmark

## Additional Product Lines

### ■ TwoFer™ Needles

TwoFer Huber-Tipped Needles enable vented and non-vented vial additions and withdrawals, effectively performing the functions of two devices. The TwoFer Needle facilitates the movement of liquid drugs from one container to another without the time and expense of changing needles. Color-coded and available in 1.5" and 1.0" lengths, the TwoFer Needle is appropriate for a variety of receptacle sizes and applications.

### ■ Tamper-Resistant Add Port Caps

Tamper-Resistant Add Port Caps are easy-to-use, hinged plastic caps that impede tampering when storing and transporting IV solutions.

### ■ Female Luer Lock Cap

The Female Luer Lock Cap is designed to seal male Luer fittings on devices such as manifolds, stopcocks or IV sets, reducing the risk of touch contamination and medication leakage.

### ■ KwikVial™ Oral Liquid Containers

KwikVial Containers are used for unit-dose packaging, delivery, and administration of oral liquid medications. Versatile and easy to use, they can accommodate a variety of dosage volumes, are sealed for tamper-prevention resistance and detection, and are designed for efficient packaging and administration.

## Key Business Partners

KwikDose and our other products are available directly from MedSafety Solutions and from various distribution partners.

## Trade Shows/Meetings Attended

Stop by our booth #439 at ASHP Midyear 2024 in New Orleans.
