Company Background

JFCRx is a pharmacy automation partner that offers a full suite of complementary pharmacy automation solutions: leading-edge equipment and software, business process improvement intelligence, comprehensive analytics, and superior customer service. Led by an experienced team of pharmacy industry veterans, JFCRx leverages real-world data to help pharmacy operations become more efficient, increase productivity, and reduce operational costs through "analytics-driven automation." More than a vendor of pouch and blister adherence packagers, inspection systems, and vial-filling automation solutions, JFCRx is a technology solutions partner that provides the tools pharmacies need to be successful.

Product Overview

■ The Groundbreaking Enlite™ Management System

Only JFCRx offers a complete suite of pharmacy automation solutions managed through one cloud-based ecosystem, Enlite. This transformative software turns any number of disparate systems into a single solution — and delivers an enterprise level of efficiency, analytics, and reporting not available before in the industry. Enlite addresses inefficiencies and communication barriers in the pharmacy industry's existing hardware ecosystem. Schedule a demo to learn more about Enlite's current reporting and dashboard capabilities and the enterprise-level expansions in development.

■ Multi-Dose Blister Card Packaging

TruCard™ is the industry's premier automated multi-dose blister card packaging solution with integrated image verification. Designed to fit the needs of any pharmacy through flexible configurations and workflows, the TruCard line provides accurate and efficient workflows to fill and check blister cards automatically.

■ Adherence Pouch Packaging

Managing medication adherence is a key challenge for patient outcomes and overall cost of care. We help pharmacies improve patient medication adherence while optimizing production and efficiencies. TruPak™ is the next evolution of adherence packaging and delivers labor-saving automated tablet pouch packaging for improved safety, efficiency, and medication adherence.

■ Pouch Verification

TruCheck™ provides adherence pouch verification for product quality, accuracy, and traceability. Efficient and accurate verification, review, and storage of adherence pouches is critical to any pharmacy operation. TruCheck streamlines production and minimizes timely manual checks while ensuring patient safety.

■ Vial Filling

Vial filling technology helps pharmacists dispense medications more efficiently and accurately versus traditional manual processes. This means staff can spend more time on patient care and depend upon the accuracy and verification capabilities of their vial filling solution. TruScript™ provides easy, safe, and accurate semi-automated vial filling. With a user-friendly interface and scalable design, it is adaptable to any pharmacy and can link multiple devices together to expand formulary capacity.

Markets Served

- Long-Term Care
- Retail
- Hospital
