## Company Background

American BioTech Supply (ABS), a Horizon Scientific, Inc. brand, provides a full range of temperature-controlled equipment to our customers across the healthcare, laboratory and clinical research, pharmaceutical, and industrial segments. The extensive portfolio of quality products ranges from small capacity countertop refrigerators and freezers, including special purpose, application-specific models, as well as cryogenic freezers for long-term sample preservation. Ensuring customer requirements are met, all products are designed in a variety of configurations, from general purpose cold storage to medical and pharmaceutical storage with stringent temperature performance requirements. With over 25 years of experience, ABS excels at quickly developing customer solutions at competitive price points while providing industry-leading service levels. The ABS advantage includes a comprehensive array of products and services to meet your temperature-controlled storage needs, an industry leading warranty, a dedicated support team, and many models are available from in-stock inventory and are ready to ship.

## Product Overview

ABS is committed to offering high-quality cold storage solutions that meet the stringent guidelines specified by the CDC. Our units incorporate cutting-edge technology to ensure temperature consistency, optimal unit design, and advanced product features that enhance vaccine preservation and overall safety.

ABS provides a wide selection of pharmacy refrigerators and freezers, including compact undercounter models and spacious upright units from 1 to 72 cu. ft., to meet various facility needs and streamline your workflow. We pride ourselves on industry-leading lead times, with many models available for shipment within five to eight business days.

Our pharmacy models include user-friendly digital temperature displays for precise readings, audible and visual high/low temperature excursion alarms for added security, natural, energy efficient refrigerants, and self-closing doors to ensure temperature recovery after door openings. With ABS, each vaccine dose receives the highest level of protection, providing your facility and patients with peace of mind.

## Features & Options

- Fastest lead times in the industry with many models available to ship within five to eight business days.
- Various configurations available including undercounter, countertop, and large capacity upright models ranging from 1 to 72 cu. ft. to accommodate diverse facility needs.
- Parametric, microprocessor temperature controller with LED display and 0.1°C resolution for superior temperature control, verification, and recovery.
- High/low temperature alarms with audible and visual indicators for exceptional product security.
- Utilizes EPA/SNAP compliant, hydrocarbon, natural refrigerants that are environmentally friendly and lowers energy expenses.
- Temperature monitoring device included that complies with the current CDC guidelines, with three-years certification of calibration, "buffered" probe in the product simulated solution, min/max memory. °F/°C switchable, and field installable.
